

## **Taking A Screenshot on a Mac Crediting Wordle (Mac or PC)**

1. To take picture of entire screen; Command+Shift + 3 (Hold down Command and Shift, then click 3)

RESULT: Picture is in memory. You can paste it in a document, or in any image application.

RESULT: The picture is also saved on the desktop as Picture 1 (or some ever increasing number). Double click on it and it will open in Preview where it can be cropped and/or saved in a different format

2. To take a picture of a portion of a screen: Command+Shift + 4 (Hold down Command and Shift, then click 4)

Then select area to be captured.

RESULT: Picture is in memory. You can paste it in a document, or in any image application.

RESULT: The picture is also saved on the desktop as Picture 1 (or some ever increasing number). Double click on it and it will open in Preview where it can be cropped and/or saved in a different format.

RESULT: To place it in Blogger, just go to Blogger, Add New Post, Insert Image, Select Picture 1 (or appropriate number), continue with alt and title modifier changes, Add text for post and title, Publish

FOR A WORDLE PICTURE the title modifier should read: Source: Jonathan Feinberg <http://www.wordle.net>
