## Full Tour of Firefox Add-On

Everything you want to know about using the Delicious Add-on

- [Install Firefox Add-On](#)

### Feature Overview

The Delicious Bookmarks add-on enhances your existing Firefox bookmarking system with a new set of tools to help you create, manage and search your bookmarks.

From now on all your bookmarks will be instantly accessible both in your Firefox browser and from your [bookmarks page](#) on the Delicious website. This means that any changes you make to your bookmarks in either location will be synchronized. For example adding or deleting a Delicious bookmark in Firefox will add or delete it from your [bookmarks page](#) on Delicious. [Learn more...](#)

The add-on has these major elements: [Three buttons for the browser](#), [the Delicious menu](#), [sidebar](#), [toolbar](#), [status bar](#). Here's what you need to know to get the most out of this powerful new tool.

### Sections

- [New Browser Buttons](#)
- [Saving a new Bookmark](#)
- [Sharing a Bookmark](#)
- [Delicious Menu](#)
- [Delicious Sidebar](#)
- [Delicious Toolbar](#)
- [Delicious Status Bar](#)
- [Importing Your Bookmarks Individually](#)
- [Managing Tag Bundles](#)

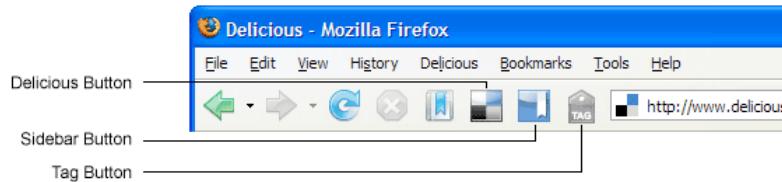

## New Browser Buttons

The first thing you'll notice is that we've added three new buttons to your browser.

- The Delicious button takes you to your Bookmarks on the Delicious web site, where you can easily view and manage your bookmarks, as well as see what other Delicious users are bookmarking.
- The Delicious Bookmarks button brings up the Delicious Sidebar, which gives you a way to quickly search and browse your own bookmarks and tags in your browser.
- The Tag button lets you save a new bookmark.

## Saving a new Bookmark

To make a new bookmark, just click the 'Tag' button, then add any tags or notes you want, and then hit the save button.

You'll then see the Save Bookmark dialog box. It shows you the URL you're saving, the "title" of the Web page (which you can edit). You can also add "notes", and add "tags" to make it easier for you to organize your bookmarks. [Click here](#) to learn more about tags. The Save Bookmark dialog box will suggest tags you've already used and popular tags from the Delicious community. If you don't want to share this page with anyone, just click on the 'do not share' box.

## Sharing a Bookmark

You can share your bookmarks plus a short message (116 characters or less) with the following groups

- Twitter: Requires you to provide your Twitter username and password. Bookmarks you share with @Twitter will appear in your Twitter feed for all of your followers.

- Delicious users: These are other friends that are using Delicious. Bookmarks you share with other Delicious users will appear in their Delicious Inbox.
- Email Address: Anybody with an email address. We will send them an email with your bookmark and message.

Sharing is Easy.

- In the Send field type the recipients name or select it from the panel that will appear at the bottom of the form.
- Once you enter one or more recipients into the Send field the Message field will automatically appear below it.
- In the message field you can enter a short message (116 characters or less) that will be included with your bookmark.
- Hit Save and we will send to all the recipients in the Send field. For example, here is how the message appears on Twitter

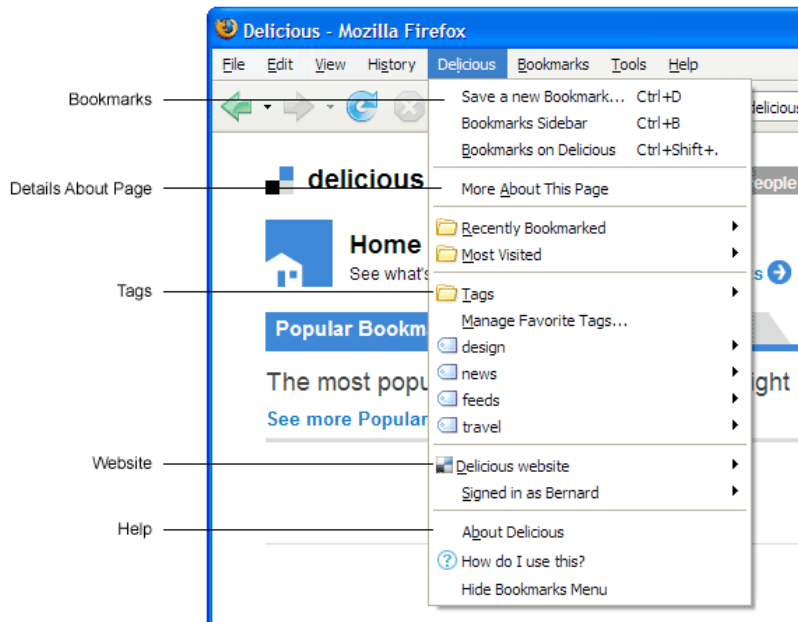

By far the best method of bookmarking on the internet! Save links for yourself and help others at the same time! <http://icio.us/40sduz>

## Delicious Menu

The Delicious Bookmarks add-on enhances your bookmarking experience with a new Firefox menu that gives you access to all of the features of Delicious. From this menu you can bookmark the page you're on or pull up the "Delicious sidebar" so you can search or browse your bookmarks. If you don't need your existing bookmarks menu anymore, you can hide it with the "Hide Bookmarks Menu" option. Don't worry, hiding the menu doesn't delete any bookmarks.

### **Save a Bookmark...**

Gives you a new way to bookmark pages. It allows you to add notes and tags to your bookmarks which helps you organize and retrieve them later.

### **Search Bookmarks**

This opens up the Delicious sidebar which is where you will find all your bookmarks. The powerful search functionality searches your tags, bookmark titles and notes.

### **More About This Page**

Want to see if anyone else has bookmarked the page you're on? Select "More About This Page" to see all the users who have bookmarked the page, along with their notes and the tags they've used.

### **Recently Bookmarked**

This entry in the Delicious menu keeps track of the pages you have most recently bookmarked.

### **Most Visited**

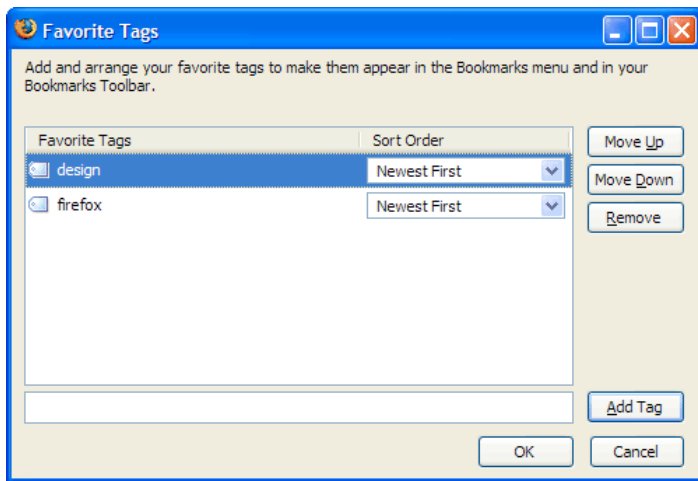

The "Most Visited" menu item keeps track of the Web sites you visit the most frequently. This makes it easy to quickly get to the sites you use the most, without having to keep track of them yourself.

### **Tags**

The Tags folder contains an alphabetized list of all of your tags.

### **Manage Favorite Tags**

Choosing your Favorite tags is the key to getting the most use out of your Delicious Toolbar. Selecting the Manage Favorite Tags menu item brings up a dialog box that enables you to specify your Favorite tags and the order in which they should be displayed. Favorite tags show up in the Delicious menu and in the Delicious Sidebar

### **Favorite Tags**

Your favorite tags are listed below the Manage Favorite Tags menu item.

### **Delicious Website**

The Delicious Website menu item brings up a sub-menu that gives you direct access to both the personal and public parts of the Delicious Web site, including your bookmarks page, your network, subscriptions, links for you, the Delicious home page, and popular and recent bookmarks.

### **Sign In**

This menu item allows you to sign into your account on Delicious. Once signed in, the menu item changes to reflect the username you're currently signed in as and offers an option to logout.

### **Import Bookmarks**

The Import Bookmarks menu item enables you to import the existing bookmarks you had in Firefox before you installed the Add-on (if you didn't during the initial installation) or any other existing bookmarks you have exported from another browser. (See the import/upload section in settings)

### **How do I use this?**

If you want to revisit this page for more tips on using this Add-on, simply choose this menu item.

### **About Delicious**

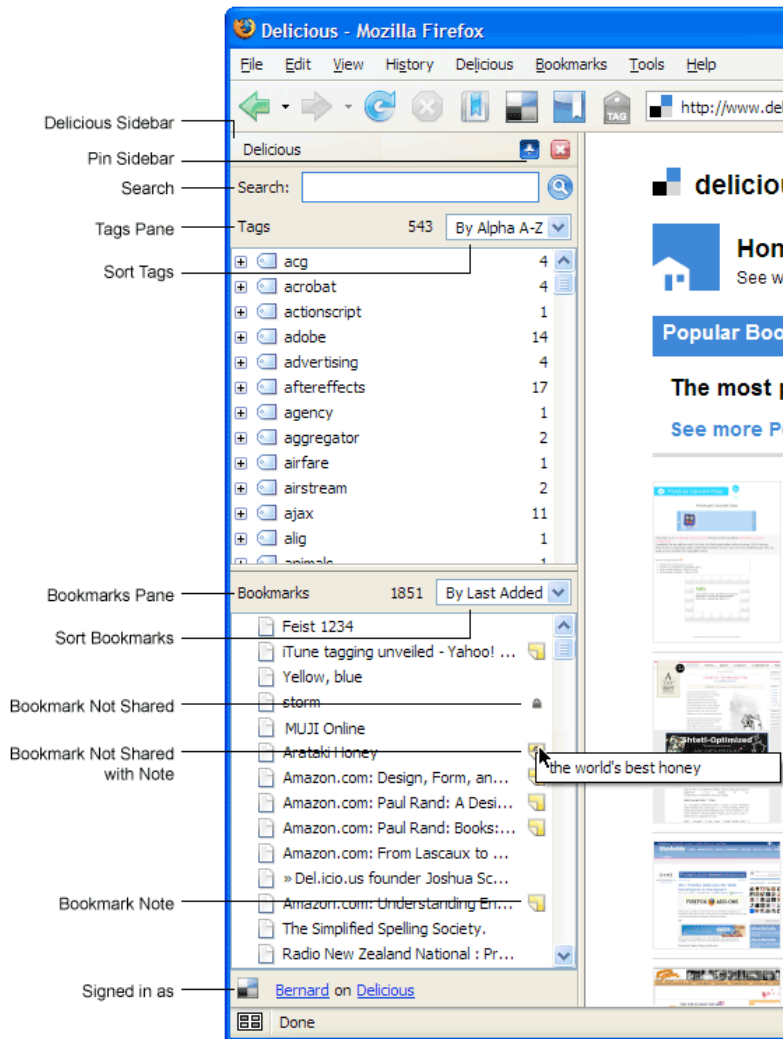

Select this item to learn more about the history of Delicious and the team.

### **Hide / Show Bookmarks Menu**

This option lets you show or hide your Firefox "Bookmarks" menu.

### **Delicious Sidebar**

Clicking on the Bookmark icon gives you instant search and browse access to all of your bookmarks in the Delicious sidebar. The sidebar has three sections: the search box, Tags pane and Bookmarks pane.

### Searching Box

Your bookmarks are searchable by typing in the "Search" box. A search term entered into the "Search" box will search the titles, tags, notes, and URLs for the Web sites you have bookmarked. What you'll see in the Tags pane are the tags that match your search term. The Bookmarks pane will show all the bookmarks that match your search term. Clicking on a tag will show you all the bookmarks associated with that tag by repopulating the Bookmarks pane. When you've found the bookmark your were looking for, one click opens up that Web site. Click the reset button to the right of the Search box to clear the search and display all your tags and bookmarks again.

### Browsing Tags

You can browse all your tags by scrolling through the Tags pane in the sidebar. Searching will narrow the list of tags you browse Expanding each tag enables you to see the other tags you've used in conjunction with that tag. Clicking on a tag will show you all the bookmarks associated with that tag by repopulating the Bookmarks pane. Once again, one click on any bookmark opens that Web site in Firefox.

### Browsing Bookmarks

You can also browse all your bookmarks by scrolling through Bookmarks. Searching will narrow the list of bookmarks you browse. When you've found the bookmark you're looking for, click on it and it will load in your browser.

### Locking The Sidebar Open

Clicking on the blue pin at the top of the sidebar will lock the sidebar open. When locked open the sidebar will not close until you click the close icon at the top. This allows you to click try different bookmarks from the Bookmarks pane without the sidebar closing. To unlock the side bar click the blue pin again.

### Other ways to bring up the sidebar

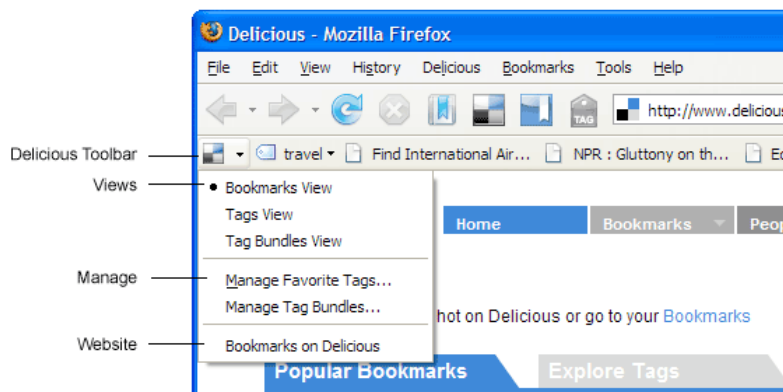

1. Select menu View > Sidebar > Delicious
2. Select menu Delicious > Your Bookmarks
3. Typing Ctrl-B

### Delicious Toolbar

You can show or hide the Bookmarks toolbar by going to the menu View > Toolbars and selecting (or deselecting) the Delicious Toolbar.

The Delicious Toolbar gives you quick access to the tags and bookmarks you use the most. The Toolbar displays only the bookmarks that have been set as your Favorite tags. If you are have created any "Tag Bundles" on Delicious, you can also choose to display these on your Toolbar.

The Delicious icon in the toolbar has a drop-down menu that allows you to switch between the three different toolbar views (Tag view, Bookmarks view and Bundles view), Manage Favorite Tags, Manage Bundles, and navigate to your bookmarks on Delicious.

### Bookmarks View

The default view for the Delicious Toolbar is the Bookmarks View. This view lets you choose a Favorite tag and see all your bookmarks with that tag as clickable buttons in your browser. For example, if one of your favorite tags is "design" and you've bookmarked a number of Web sites with that tag, selecting the "design" tag in the toolbar will show you all of your most recent bookmarks with that tag.

You can change which tag is shown by clicking on its name. This will display a drop-down menu from which you can choose a different tag, the Recently Bookmarked folder or the Most Visited folder.

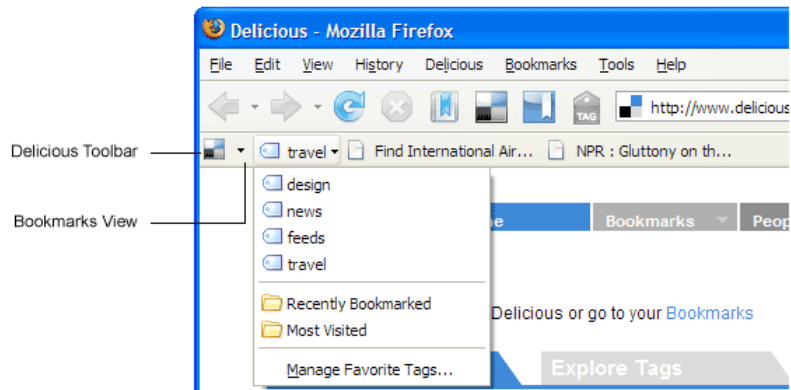

The Bookmarks View is most useful if your current browser session requires you to access a number of related Web sites that all have the same tag. When your focus changes to a different subject area, you can choose a different favorite tag and have one-click access to those bookmarks.

### Recently Bookmarked

This entry in the Delicious Toolbar menu lists the pages you have most recently bookmarked.

### Most Visited

This entry in the Delicious Toolbar menu lists the Web sites you visit the most frequently. This makes it easy to quickly get to the sites you use the

most, without having to keep track of them yourself.

### Tags View

The Tags View surfaces all your Favorite tags as drop-down bookmark menus on the Toolbar. You can switch from the toolbar Bookmarks View to the Tags View by clicking on the Delicious icon on the Toolbar and selecting the Tags View from the menu.

Unlike the Bookmarks View, which focuses on one tagged set of bookmarks at a time, the Tags View is most useful if you want access to all your bookmarks associated with your Favorite tags from the toolbar.

### Bundles View

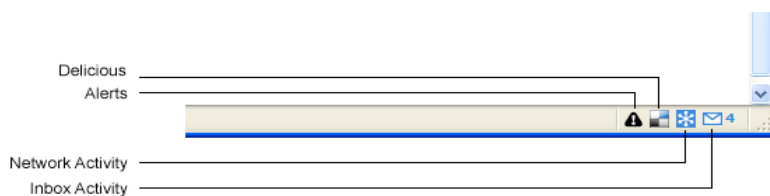

This view lets you view all your bundles in your toolbar. Simply click a bundle to view all the tags and bookmarks in that bundle.

### Manage Favorite Tags

Choosing your Favorite tags is the key to getting the most use out of your Delicious Toolbar. Selecting the Manage Favorite Tags menu item brings up a dialog box that enables you to specify your Favorite tags and the order in which they should be displayed. Your Favorite tags show up in both the Delicious Menu and in the Delicious Toolbar, and are a great way to get to the websites you use the most.

### Delicious Status Bar

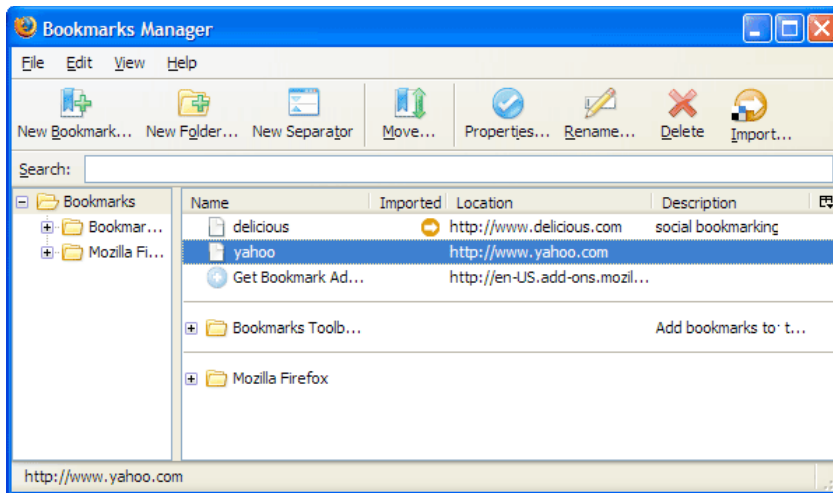

If you look down at the bottom right of your browser you'll see some new icons in the status bar. They will give you quick access to the Delicious website, notify you about new activity in your network and inbox.

### Importing Your Bookmarks Individually

You to pick and choose which Firefox bookmarks you want to import individually. To get started, select "Organize Bookmarks" from the Bookmarks menu. If you don't have a Bookmarks menu, select "Show Bookmarks Menu" from the Delicious menu.

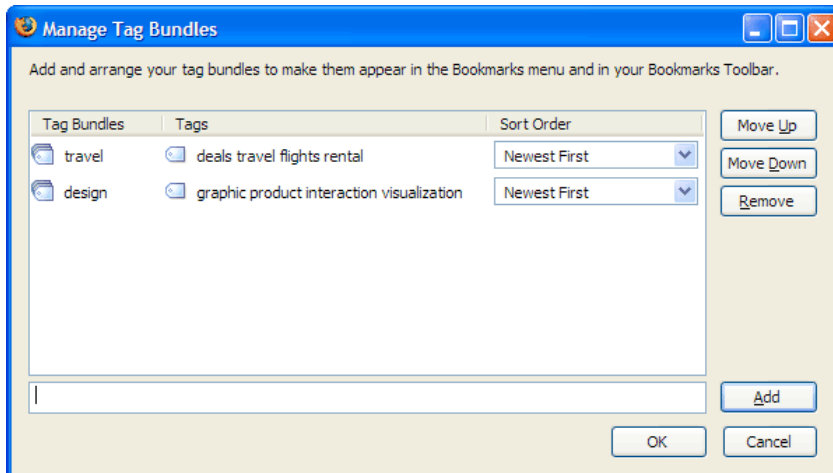

You'll see the Organize Bookmarks screen. From here, simply select one or more bookmarks to import. Then lick the "Import" button to begin your import. It may take a few minutes for your import to complete. You can see which bookmarks are already imported by lloking at the Import column an orange arrow.

## Managing Tag Bundles

Tag Bundles provide an easy means of organizing your tags into groups. To manage them, select "Manage Bundles" from your Delicious Toolbar menu.

You'll see the Manage Tag Bundles screen. From here, you can add, delete, and edit bundles. Simply enter a bundle name and click "Add" to create a new bundle. Once your bundle is added, you can enter one or more tags and click "OK" to save your changes. Now you can easily access your bundles from the toolbar by selecting "Bundles View" from the Delicious Toolbar menu.
